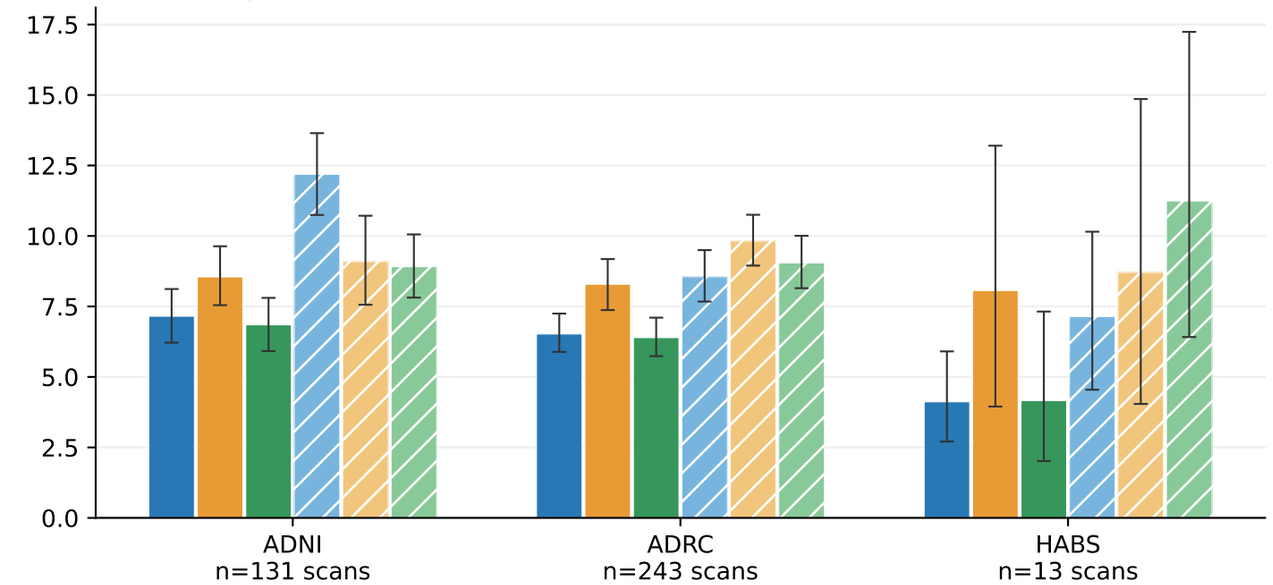
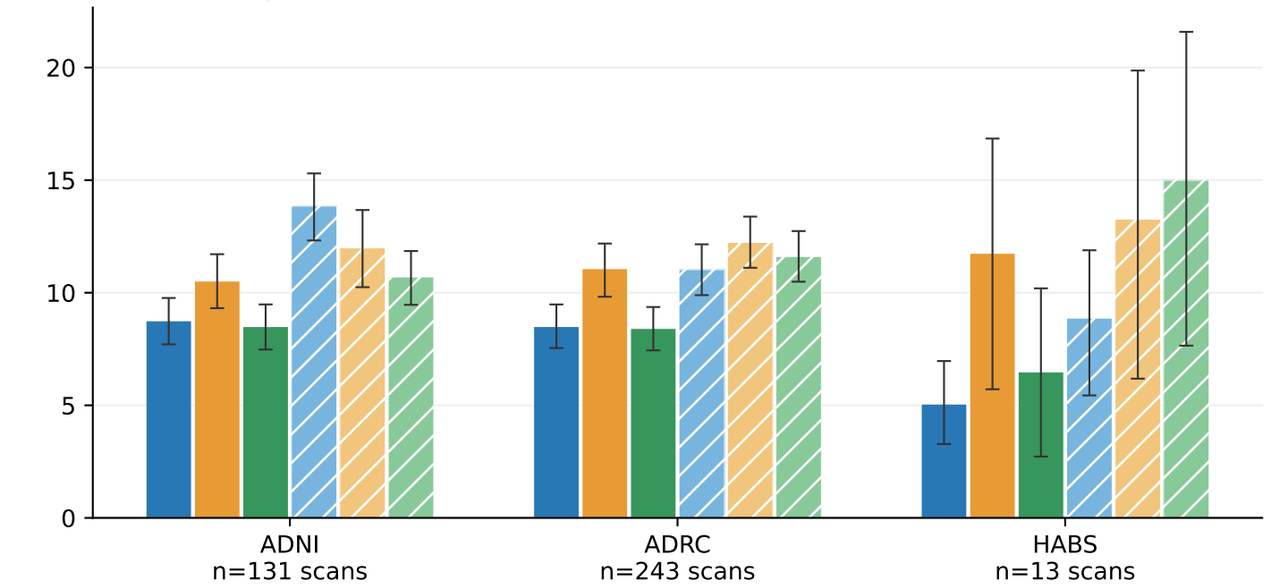
Brain-age prediction by cohort and model

Ridge: DWI-only
Ridge: fMRI-only
Ridge: weighted early fusion
GNN: DWI-only
GNN: fMRI-only
GNN: fusion

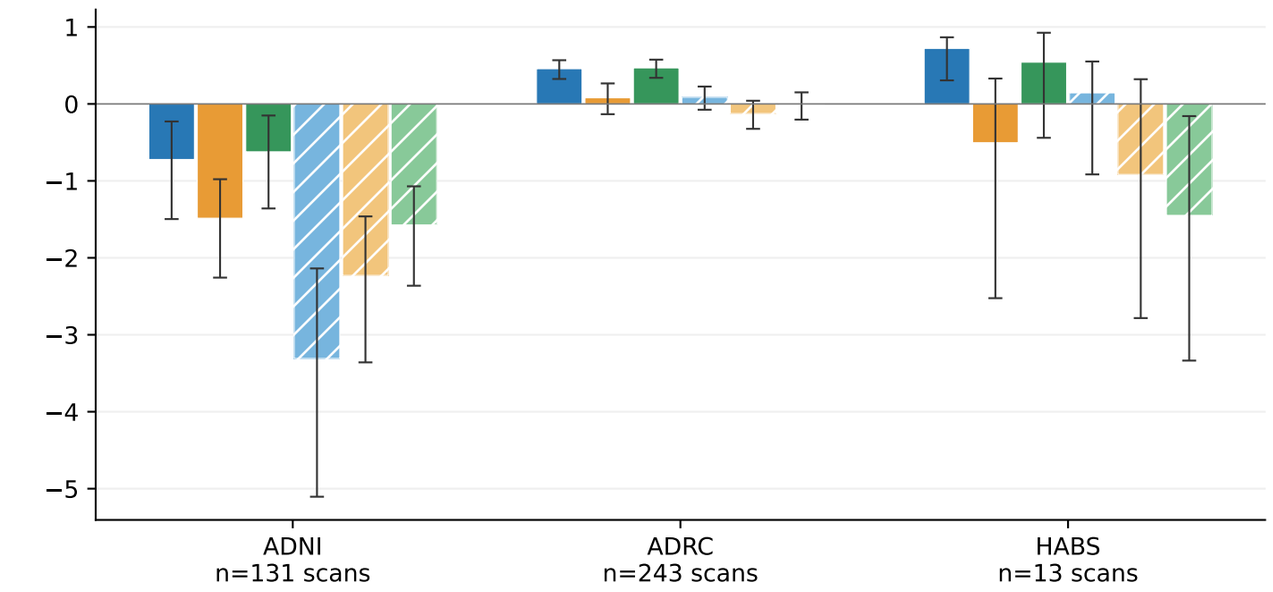
A. MAE (years)



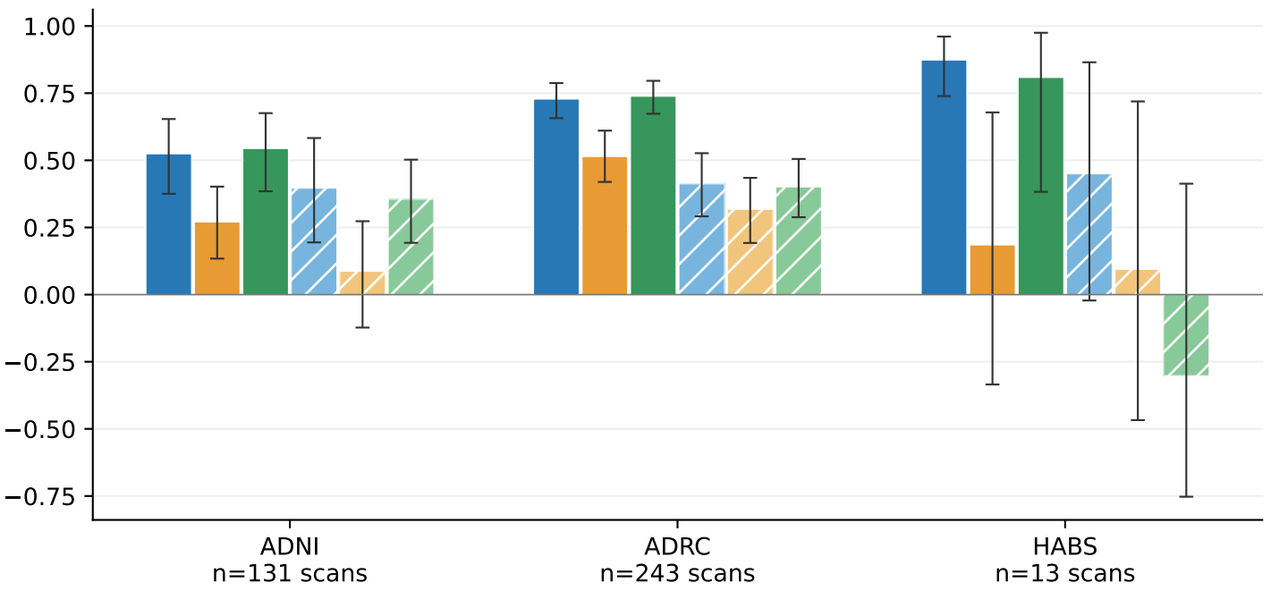
B. RMSE (years)



C. R²



D. Pearson r



Raw CN out-of-fold predictions on matched scans; participant-cluster bootstrap 95% CIs.
Lower MAE/RMSE and higher R²/r are better. HABS: 13 participants; ADDecode: no paired fusion data.
